Let Your Imagination Take Off

Class projects come alive when you build with STYROFOAM™ Brand Foam Kits. You'll find a galaxy of great school project ideas in this book to learn science, history, architecture and more. Make it: Fun® Project Bricks, made from STYROFOAM‡ enhance problem-solving skills and fine motor abilities as you design and build your projects from the ground up – your imagination is the only limit to what you can accomplish!

Out of this World !

This cute galaxy of friends is crafted from the FloraCraft® Solar System Kit with just a few additional accents to give them personality. Add small, paper signs with the planet names for them to hold to create a fun learning game.

Solar System Kit

Reach for the stars and build your own solar system using the FloraCraft® Solar System Kit. This kit helps students gain hands-on knowledge of how the solar system is arranged. The best part is the kit includes fun facts, quizzes and web links to let your mind soar the galaxy!

Molecule Kit

This kit includes everything you'll need, including instructions, to build 16 different molecules that are great for teaching and learning. Also included are fundamental facts about the molecules you build, a handy periodic table of elements, a glossary of chemistry terms and web links to educational chemistry sites.

DNA Kit

DNA, the building block of life, is the material that transfers genetic characteristics in all life forms. By building a model of DNA using the FloraCraft® DNA Kit, students gain hands on knowledge of this very complex molecule. Fill your brain with more science... fun facts and web links are also included in this kit!

Diorama Kit

School projects demand better than a beat up, old shoe box! Give them a proper setting with the Make it: Fun® Diorama Kit. To assemble your shadow box, simply glue the kit's five sheets of STYROFOAM* together with low-temp glue. Ours shows the life cycle of a frog, but the possibilities are endless.

Galaxy of Art

Fire up your imagination and create a Solar System with unique textures and finishes. We've created wall art by simply cutting the balls of STYROFOAM* in half and covering them using the tips shown here!

STYROFOAM* TECHNIQUES

STYROFOAM* serves as the perfect foundation of every great craft project! Below are some easy techniques for working with STYROFOAM*.

TIP

To add a fun surface texture or dimension to your pieces, wrap aluminum foil around completed shape.

Crinklele foil before applying to create additional texture.

Paint your shape using acrylic paint.

Let the first coat of paint dry thoroughly. Then add additional colors using dry-brushing, sponging or other painting techniques for interesting color texture.

TIP

Decorate the shape using air-dry clay. Follow package directions for drying time. You can also use paints, fabrics or other materials to achieve the look you desire.
